24. A snag-free wristwatch system having substantially smooth surfaces and flowing contours and free of protruding elements and external stems, which comprises:

(a) a battery operated watch for displaying time;

(b) a pressure sensitive device operatively connected to said watch for control of said watch;

(c) a band of flexible polymer-based material attached to said watch for retaining said watch on a limb of a wearer, said watch, said pressure sensitive device, and said band having flowing contours and surfaces substantially smooth to the touch.--

Please amend claims 2-10 and 13-21 as follows:

2. (Amended) The snag-free wristwatch system of Claim 23 further including snag-free access means for replacing said battery, said access means having substantially smooth and flowing contours when closed.

3. (Amended) The snag-free wristwatch system of Claim 23 further including snag-free clasp means having substantially smooth and flowing contours when closed.

A2 4. (Amended) The snag-free wristwatch system of Claim 23 further including snag-free clasp means for closure of said band wherein said clasp means are of the bayonet type having the closure release within and adjacent to elastically deformable portions of said band into which said bayonet is inserted when said clasp is closed, said clasp having substantially smooth and flowing contours when closed.

5. (Amended) The snag-free wristwatch system of Claim 23 wherein said wristwatch system is water-resistant.

6. (Amended) The snag-free wristwatch system of Claim 23 further including snag-free attachment means connecting said watch to said band, with said attachment means having substantially smooth and flowing contours.

7. (Amended) The snag-free wristwatch system of Claim 23 wherein said band is continuous and stretchable.

8. (Amended) The snag-free wristwatch system of Claim 23 wherein said watch is set in said band, with the display and exposed portions of said watch and adjacent portions of said band having substantially smooth and flowing contours.

A2  
revised

9. (Amended) The snag-free wristwatch system of Claim 23 further including ornamentation incorporated into said watch and said band so as to be visible within the substantially smooth surface and flowing contours of said watch and said band.

10. (Amended) The snag-free wristwatch system of Claim 23 wherein said pressure sensitive device for control of said watch is located below and adjacent to elastically deformable indents on the surface of said watch, said indents being snag-free and below the substantially smooth surface of said watch.

---

A3

13. (Amended) The snag-free wristwatch system of Claim 24 further including snag-free access means for replacing said battery, said access means having substantially smooth and flowing contours when closed.

14. (Amended) The snag-free wristwatch system of Claim 24 further including snag-free clasp means having substantially smooth and flowing contours when closed.

15. (Amended) The snag-free wristwatch system of Claim 24 further including snag-free clasp means for closure of said band wherein said clasp means are of the bayonet type having the closure release within and adjacent to elastically deformable portions of said band into which said bayonet is inserted when said clasp is closed, said clasp having substantially smooth and flowing contours when closed.

16. (Amended) The snag-free wristwatch system of Claim 24 wherein said wristwatch system is water-resistant.

17. (Amended) The snag-free wristwatch system of Claim 24 further including snag-free attachment means connecting said watch to said band, with said attachment means having substantially smooth and flowing contours.

18. (Amended) The snag-free wristwatch system of Claim 24 wherein said band is continuous and stretchable.

19. (Amended) The snag-free wristwatch system of Claim 24 wherein said watch is set in said band, with the display and
